Zone: 5a

A spiral staircase connects the main patio and native plantings to the lower level outdoor living environment (above).

The water feature accents the patio and fire pit area with its natural seat boulders.

The pergola's seating area looks out over the outdoor living environment (left).

The mountain views over the flagstone patio and seating are a bonus to the native backdrop.

A native plant palette was used in the plant beds looking out over the patio and fire pit area (below).
